No,

I need soonest numbers in XXXX in following

“Of the approximately 4500 water systems that were initially projected to be impacted by Hurricane Harvey, approximately 2200 systems were in the affected area.

Of the systems in the affected areas, xxxx are community water systems that serve a population of xxxx, and xxxx are non-transient non-community water systems that serve hospitals, health care facilities, nursing homes, and day cares, with a population of a.

Currently the EPA and TCEQ have made contact with xxxx community water systems and have confirmed they are fully operational and servicing water to a population of xxxxx. As of xxx, there are xxx systems that have reported being on a boil water notice and xxx have reported a water outage.

After a momentary silence spake
Some Vessel of a more ungainly Make;
"They sneer at me for leaning all awry:
"What! did the Hand then of the Potter shake?"
Water: What is it Worth to You?

At 2:30pm we are prepared to send
-The raw data dump
-The Shape file (still waiting on what changes need to be made)

For the summary report, since this is our first time doing it, if TCEQ complete that today and we will develop ours and then we can confirm our methods get the same result before taking it on tomorrow.

Does that work for all parties?

Joe Schaefer
Environmental Response Team

US EPA
